## OUR MISSION

As a small business working to generate interest into the services we offer and to positively impact our community PJ Management has a clearly defined mission.

The Mission of PJ Management is to integrate Community Service with Business in an ongoing effort to provide a diversity of programs and services that are easy to implement and manage. This Mission will prove that “Together People Can Make a Lasting Change” even when working within the business model of companies like PJ Management who are not non-profit organizations!

Our belief is that an individual or for profit company should not have to establish a non-profit status in order to have a positive impact on the surrounding communities they serve. In fact more individuals and companies small to large should be encouraged to take an active roll in their communities and PJ Management will become a flagship showing others how to do the same.

One look at the funds available through Foundations, Organizations and Governmental Agencies will tell you that there are ample resources available to provide money in grant form to help businesses like PJ Management take an active roll in our community by becoming a proactive leader in doing really beneficial work that helps people regardless of race, religion or personal orientations.
